Planning for the season

Both Glenn and Ross have between them over 30 years of local experience in both farming and agricultural contracting. There are often many variables to consider when planning feed crops. Call us now to discuss your needs.

Pottinger Loader Wagon

Replacing the Claas Loader Wagon due to reliability issues we now have the new Pottinger Jumbo Combiline 6610 Loader Wagon. With a 2m wide pick up, 8 rows of tines feeding into a 33.8 m³ capacity bin.

Other specifications include:

- 45 knife cutter bar for greater even grass cut
- Tandem axle with leaf spring suspension with floatation pro tyres for less ground compaction

The new wagon has the Pioneer inoculant dispenser.

West Dual 2000 Spreader

At the end of last year we acquired the capacity to provide to you the ability to spread waste products including but not exclusive to; slurry, compost, cow manure from yard and feed pad, solid dung, stock bedding, drain and dam cleaning, poultry manure and old silage.

The impressive features of the spreader include large wide tyres to ensure low compaction, 9.1m³ volume capacity and spread rate of up to 2.1metres.

Using the waste products off your farm and/or property is both economically and environmentally friendly.

Book in your West spreading by the 2nd November 2014 for a 10% discount off the hourly rate.

Additional Services

Silage and Hay

We can provide to you two sizing options when it comes to square bales for both silage and hay. The Quadrant 2100 can provide 800mm wide by 700mm high bale and the Quadrant 1100 can provide 800mm wide by 500mm high bales. Dependant on your storage or delivery capabilities we can provide the bale to suit. In addition the Quadrant 2100 can cut the grass as it feeds into the baler. Silage bales can be individually wrapped or in pairs for both balers.

Allis Chalmers Scoop

After a little bit of modification work we have available a 4 wheel, 6 cubic metre scoop for races and earth works.

At the work shop we have new feathered friend. Currently answering to 'birdie' our visiting pigeon is filling up well on bird seed kindly bought by Scooter.
